DEEPAK PARMAR

.NET Developer | Full Stack Engineer | Cloud & AI

Ahmedabad, Gujarat, India • deepakparmar4264@gmail.com • +91-9079684264 • linkedin.com/in/deepak-parmar-155993205

PROFESSIONAL SUMMARY

.NET Developer with 4.5+ years of experience building scalable **enterprise and ERP applications** using C#, .NET Core, Web API, Angular, SQL Server, Azure and GCP. Strong experience in **microservices, Clean Architecture, database and API performance optimization**, and enterprise integrations including QuickBooks. Experienced in developing **high-performance APIs** and responsive web applications, with hands-on experience in **Azure-to-GCP cloud migration** initiatives involving App Engine, Cloud Run, GKE, and Cloud SQL. Familiar with **AI technologies** including **Azure AI Search, Semantic Search, RAG, ML.NET, and LLM** integration through hands-on learning and experimentation.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET Core, .NET Framework, ASP.NET MVC, Web API, WPF, **Angular 19**, DevExpress

Database & ORM: SQL Server, Entity Framework, Dapper, XPO ORM

Cloud & DevOps: Microsoft Azure (App Services, Azure SQL, Azure Functions, Service Bus, Blob Storage, AKS, Application Insights), **Google Cloud Platform** (Cloud Run, App Engine, GKE, Cloud SQL, Secret Manager, Pub/Sub, Cloud Storage), Docker, Azure DevOps, GitHub Actions, CI/CD

Architecture : Microservices, **RESTful APIs, Clean Architecture**, N-Tier Architecture, MVVM

Messaging & Background Jobs: RabbitMQ, Hangfire

Testing & Tools: Postman, Swagger/OpenAPI, JMeter, Git

AI & Emerging Technologies: Azure AI Search, Semantic Search, RAG, LLM Integration, ML.NET

AI-Assisted Development Tools: Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

.NET Developer / Software Engineer | Tecmantras

Feb 2025 – Present | Ahmedabad, Gujarat

.NET Application Modernization & Cloud Migration (Azure to GCP) - Ongoing

- Modernizing legacy .NET Framework applications to .NET Core to improve application maintainability, scalability, performance, and cloud compatibility.
- Migrating and deploying modernized .NET applications from Microsoft Azure to Google Cloud Platform (GCP), primarily using **Cloud Run**.
- Implementing CI/CD pipelines using **GitHub Actions** to automate application builds, deployments, and release workflows for GCP environments.
- Integrating GCP services, including **Secret Manager (GSM), Pub/Sub, Cloud Storage, and Cloud Run functions**, to support secure configuration management, asynchronous messaging, file storage, and event-driven processing.
- Analyzed existing Azure services, application dependencies, integrations, and data flows to map suitable GCP alternatives, while developing and validating migration PoCs to address framework compatibility, configuration, dependency management, and deployment challenges.
- Supporting end-to-end application modernization and cloud deployment activities, troubleshooting migration issues and ensuring successful application deployment on GCP.

ERP Platform — Clothing Sector

- **Led development of a scalable microservices-based ERP platform** for the clothing sector using **.NET Core Web API and RabbitMQ** for async communication.
- Built responsive **Angular** UIs, enhancing user experience and workflow efficiency.
- Implemented **Hangfire** for high-volume background jobs including invoicing and data syncing.
- Integrated **secure third-party payment APIs** for seamless financial operations.
- **Improved API performance by 65%** and **increased user capacity 3x through Redis caching** and SQL query optimization.
- Delivered clean, maintainable code within Agile sprints and collaborated across cross-functional teams.

Senior .NET Developer | **Acty System India Pvt. Ltd.** *Jun 2022 – Jan 2025 | Ahmedabad, Gujarat*

- Developed ERP modules for **Angular-based web and WPF desktop applications**, delivering consistent and user-friendly experiences.
- Integrated **QuickBooks API** to automate financial workflows and improve operational efficiency.
- Built scalable business modules using **XPO ORM, CodeSmith, and MS SQL** Server for robust data handling.
- Designed database schemas and **optimized stored procedures** for high-performance data access.
- Tuned **LINQ queries and backend logic** to efficiently handle large datasets in DevExpress grid controls.
- Implemented **MVVM architecture** in WPF applications for maintainable, testable desktop software.
- Collaborated with QA and business teams to deliver reliable, high-quality technical solutions across multiple ERP projects.
- Developed and enhanced ERP applications for **industrial and manufacturing** clients, including PMI Kyoto, YAC Robot Systems, and NS.

Associate Software Engineer | **Squalo Infotech** *Nov 2021 – Jun 2022 | Jaipur, Rajasthan*

- Gained hands-on .NET development experience working on web and desktop application modules.
- Worked on Java application backend logic and debugging tasks.

EDUCATION

Bachelor of Technology — Computer Science & Engineering *2022*

Compucom Institute of Technology & Management, Jaipur, Rajasthan **| CGPA: 8.56 / 10**

KEY ACHIEVEMENTS

- Improved API performance by 65% through Redis caching and SQL optimization, supporting 3× user capacity.
- Assessed 20+ enterprise .NET applications for Azure-to-GCP migration, covering architecture, dependencies, risks, and migration effort.
